RE: Construction at Plant-6 (Park Lane)

Dear Customer:

The District is has started phase 2 of a large water treatment upgrade at our Plant-6 (Park Lane/Motor Lane) pump station. This construction will be primarily on the East side of our property and is intended to be completed in the Spring of 2021. We have reconstructed the site in such a way as to be able to maintain production from a single well on the site at all times. The upgrades to the water treatment plant are necessary to continue to supply the highest quality water to our customers in the most cost effective manner. We expect to receive periodic deliveries from construction vehicles, as well as chemical trucks to maintain the operation of the already completed portion of the station.

The upgrades are being paid for by the US Navy and NOT by the Bethpage Water District or their consumers.

We have nothing to do with the work being performed in the LIPA right of way, under the wires, adjacent to Motor Lane and Albergo Court. That project is being operated by the NAVY.

Future updates on this project will be posted on our website www.bethpagewater.com and emailed to everyone on our email list. If you wish to be included on the updates please email your name, address, phone number and best email address to info@bethpagewater.com.

If you have any questions, please free to contact the office at 516-931-0093.

Very Truly Yours,

Michael J. Boufis
Superintendent
Bethpage Water District
